Curriculum Vitae – January 2026

This is a placeholder file that ships with the academic-homepage template. Replace it with your own CV:

1. Drop your PDF into public/ , naming it with the year and month so anyone who saves it can tell which version they have.
2. Point CV_URL at it, at the top of src/data.js .

The repository also carries a LaTeX CV template at cv/cv.tex , so the CV and the site that links to it stay in one place.
