

YUZHANG FANG

Full Name: Yuhang Fang
Email: yuhang.fang@usp.br

Phone: +55 (11) 926505500
Date of Birth: 17 December 2001

Education

Universidade de São Paulo <i>Double Degree with Politecnico di Milano</i> Major: Engenharia da Computação	<i>Aug. 2026 – Present</i>
Politecnico Di Milano <i>Master of Engineering</i> Major: Geoinformatics Engineering	<i>Sep. 2025 – Present</i>
China University of Geosciences Beijing <i>Bachelor of Engineering</i> Major: Computer Science and Technology	<i>Sep. 2020 – Jun. 2024</i>

Internship Experiences

Anhui Provincial Basic Surveying and Mapping Information Center <i>Technical Specialist</i> - Contributed to the maintenance of a province-wide geographic database, updating more than 3000 spatial data entries. - Contributed to the development of Python scripts for batch coordinate transformations and automated data cleaning.	<i>Hefei, China</i> <i>Oct. 2024 – Jun. 2025</i>
Parallel Computing and Visualization Laboratory, CUGB <i>Research Intern</i> - Tested a distributed stream processing platform, evaluating data throughput under 3 topologies and 5 task configurations, with more than 50 experimental data sets analyzed. - Designed performance benchmarks and identified bottlenecks in data processing pipelines, achieving an improvement of 15% in average system throughput.	<i>Beijing, China</i> <i>Sep. 2023 – Mar. 2024</i>

Project Experiences

Urban Traffic Flow Optimization and Safety Analysis using GIS <i>Independent Developer</i> - Built a GIS-based transportation analysis workflow to map congestion hotspots and accident-prone road segments using multi-source spatial data. - Integrated road network topology, intersection density, and peak-hour traffic indicators to evaluate corridor-level performance and bottlenecks. - Designed scenario-based optimization proposals and visualized impacts with thematic maps.	<i>Nov. 2025 – Feb. 2026</i>
WebGIS-Based Spatial Analysis and Visualization of Shanxi's Coal Economy <i>Team Member</i> - Cleaned and standardized 20 years of coal industry data from Shanxi Province using Python, building a spatial analysis-ready database. - Developed dynamic visualization and interactive data query features using Leaflet and GeoServer.	<i>Mar. 2022 – Jul. 2022</i>

Extracurricular Activities

Team Member , School Robotics Team (Participated in two robotics competitions)	<i>Feb. 2021 – Feb. 2022</i>
Volunteer , School Volunteer Association (100 hours of volunteer service)	<i>Oct. 2020 – Sep. 2023</i>

Honors & Awards

- First-Class Scholarship:** China University of Geosciences Beijing, 2021–2024 academic year.
- Second Prize:** Esri Cup GIS Development Competition for Chinese College Students.

Skills

- Languages:** English(B2), Chinese(Native)
- Programming Languages:** Python, Typescript, C++
- Software Tools:** Matlab, GeoServer, ArcGIS Pro, QGIS, Supabase

Interests

- Marathon Running:** Completed multiple full marathons with a personal best of 2:58:32.
- Basketball:** Certified National Level 2 Basketball Referee in China.
